# 1 Abstract & Purpose

## 1.1 Public Summary

This document has been prepared to describe the different functional modules to be implemented in the scenarios to be demonstrated in Madrid throughout the SECUR-ED project.

Business process modelling approach has been selected to maximize clarity and understanding at every level within the project.

This document includes a general description of the scenarios and a detailed functionality for tools related to each scenario.

## 1.2 Purpose of the document

WP42 will demonstrate several tools and techniques to enhance security in Madrid transportation operations using several functional modules:

- **Incident Management System** (called GEIS).
- **Geographical Information System** (called SGRAF).
- **Specific Passenger Information System** (called SGIP).
- **Intermodal CCTV.**
- **CCTV on board.**
- **Network monitoring Tool.**
- **Switching intelligence.**
