Status:	Issued				

1 Public Summary

The purpose of this document is to specify the system requirements for the Software Tool to be developed under WP31 “Preparedness” to perform Risk Assessments.

This Risk Assessment tool is intended to be used in first place by the SP5 “Deployment and performance assessment” users helping them on the execution of the risk assessment for the satellite demonstration.

This tool will implement the best practices described on the same work package in the deliverable D31.2 “Short and simplified written guidelines / handbook for conducting risk assessments”.

The user interface is developed as a user friendly way to execute the step-by-step approach described on the referenced document.
