1 Public Summary

The aim of this document is to describe integration activities for the different capacities to be demonstrated in Madrid showing how they will address the objectives of different security scenarios within the SECUR-ED project and how they will follow the architecture guidelines presented by WP41 (“Architecture and Interoperability”) when possible.

The information depicted is the result of the integration works performed within the project to adapt the different capacities presented in SP3 within the multi-PTO specificities of Madrid region scenarios.

Document structure will follow a common approach for different scenarios and required functionalities described in D42.1 and D42.2.
