1 Abstract & Purpose

1.1 Public Summary

This document has been created in order to summarize the experimentations about the different scenarios that were developed in Madrid in November 2013.

According to the DoW the deliverable D42.4 includes the various demonstrations, and experimentation report and is included inside the task 42.3 called "Experimentations". The task is divided in several parts:

- Play scenarios defined in task 42.1.
- Verify that the system answers correctly to the identified threats, and that the capacities are robust and interoperable.
- Support the organisation of events related to this specific demonstration.
- Eventually, capacities updated according to the requirements defined in the integration phase will be integrated during this phase.

The document is divided in two different parts. The first one summarizes all the meetings and the dates of the technological test that have been done for the correct development of the scenarios. The second one gives all the details about the different sessions developed divided as follows:

- Sessions developed
- Capacities involved
- General overview about the place where the incident happens
- Storyboard: this point starts giving an overview about the place where the scenario took place, after that a summary about the scenarios and all the details of them (including pictures and videos) are given.

- End of Document -
