1 Public Summary

This deliverable D33.4 named “Report on architecture with unified or common interfaces” is about the architecture and the interfaces used in the project by the partners in order to exchange data and communicate each other, with a special focus on CCTV and associated analytics.

The first part of the document describes the integration requirement: Event Notification, Feature Invocation, Identification Namespace, Enterprise Service Bus.

In the second part the interfaces used by the partners are defined and the capacities of each partner are listed. For each partners are described the features provided and the message sent to the SOCC.

In the last two parts of the documents are described the detail of the interfaces used and the tools used by the partners to integrate and test the interfaces.
