Public Summary

This deliverable describes the functional results, operational constraints and costs of the Berlin demonstration in a consolidating way.

At the Berlin demonstration of the SECUR-ED project, the focus was not be technology but on providing security training for employees.

This is because employees are a key part of security. Technology alone cannot replace company staff. This deliverable will describe the results and lessons learned of our trainings within “WP45 – Berlin demonstration”

This demonstration provided an opportunity to assess the project content, training materials and effectiveness. Because only assessing skills gaps beforehand can determine whether any knowledge gaps have been closed and response to situations improved, thereby increasing security for the transport operator.
