1 Public Summary

This deliverable document is the outcome of the preliminary evaluation of SECUR-ED capacities, as they are described in “*SP3 – Capacities integration*” material, prior to testing in “*SP4 – Integration and implementation*” and “*SP5 – Deployment and performance assessment*” demos.

In line with “*D46.1 - Guidelines for Results Consolidation*”, it provides a first assessment on the potential of and the conditions under which each of the proposed capacities can fulfill its stated objectives. It is based on structured interviews with “*SP3 – Capacities integration*” members responsible for the capacities, with the corresponding deliverables from “*SP3 – Capacities integration*” and other material furnished by “*WP51 – Deployment methodology and coordination*” and “*WP52 – Risk management application to additional operators*”. It documents, in a systematic way, pre-demo estimates and expectations of effectiveness, costs and general usefulness.

It also outlines and provides an initial assessment on those capacities that, for various reasons, will not be included in any demo.

The evaluation remains at a generic level and does not address quantitatively the implementation of the solutions and their integration in response to operationally identified vulnerabilities.
